# DISINFECTION

OFFICIAL RESELLER OF LIFE  CLEAN

Disinfection with documented effect against virus, multi-resistant bacteria, spores, biofilm, yeast and mold

Superior effect

Gentle on the environment

Does not develop resistance

Does NOT contain alcohol or quats

## ONE PRODUCT FOR ALL AREAS

### SHORT CONTACT TIME

LifeClean provides great time and cost savings due to its short contact time at maximum 2 minutes. LifeCleans contact time is shorter than the drying time.

### 3 IN 1 ACTION

LifeClean is an innovative, one action disinfection that cleans, disinfects and protects. The ideal disinfection solution.

### PROVEN EFFICACY

LifeClean is routinely tested at independent laboratories according to current EN-standards. The fulfilled EN-standards insures our users of a truly effective protection when using LifeClean.

### USER-FRIENDLY

A disinfection that is ready and easy to use. No pictogram symbols because of the gentle health and environmental abilities. LifeClean is classified as safe according to 1999 45 EG.

## PRODUCT

LifeClean is a patented and stable disinfection based on ClO<sub>2</sub> with 100% effect and is evaluated as a high-level disinfection.

LifeClean eliminates multi-resistant bacteria, spores, viruses, yeast, mold and biofilm. In addition, LifeClean reduces unpleasant odours (e.g. urine and mold), is very effective in wet environments and eliminates parasites (e.g. coccidia).

### 100% EFFECTIVE – DOES NOT DEVELOP RESISTENS

LifeClean destroys the genetic coding of RNA, which destroys DNA and prevents multiplication and resistance development. With LifeClean there is no risk of developing resistance.

### EFFECTIVE AGAINST BIOFILM

LifeClean breaks down biofilms and eliminates microbes. Continuous use of LifeClean counteracts the construction of biofilms. As part of the product's unique composition, LifeClean also contains surfactants that provide a cleaning effect.

## SECURE YOUR FARM NOW

In the day-to-day management of farm animals and large productions, infections and diseases are one of the greatest threats to animal and human welfare. Viruses, bacteria and spores spread and can contribute to big losses for the farm both economically and emotionally. Make sure you include LifeClean in your biosafety routines.

### PRODUCED BY LIFECLEAN

LifeClean is developed and produced by the Swedish disinfectant company LifeClean International AB.
